Hugging Face — Medium — YouTube

Education

Gurunanak University Hyderabad, India
Bachelor of Technology in Artificial Intelligence and Machine Learning *2024 – 2028*

- Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Statistics, NLP, Database Systems

Experience

Artificial Intelligence Intern January 2026 – Present
Glowlogics Solutions *Remote*

- Built end-to-end ML pipelines in Python and Scikit-learn for delivery-time prediction and fraud detection use cases
- Performed data cleaning, feature engineering, and exploratory analysis with Pandas, NumPy, and SQL to improve model inputs
- Trained and evaluated supervised models for regression and anomaly/risk scoring; iterated on features to raise predictive performance
- Collaborated with the team to translate business problems into measurable ML solutions and documented experiments for reuse

Projects

Multilingual Sentiment Analysis | *Python, Hugging Face Transformers, Gradio* 2025

- Developed a multilingual sentiment analysis system using Hugging Face Transformers.
- Built and deployed a Gradio application on Hugging Face Spaces for real-time sentiment prediction.

Fraud Detection System | *Python, Scikit-learn, Pandas, NumPy* 2025 – 2026

- Built an ML fraud detection model using classification and anomaly detection techniques.
- Performed preprocessing, feature engineering, and evaluated models using Precision, Recall, and F1-score.

Swiggy Delivery Time Prediction | *Python, Scikit-learn, Pandas* 2025 – 2026

- Built regression models to predict Swiggy food delivery times using historical delivery data.
- Performed preprocessing, feature engineering, and compared regression algorithms.

Customer Churn Prediction | *Python, Scikit-learn, Pandas* 2025

- Built supervised ML models to predict customer churn from customer behavior data.
- Performed feature selection and evaluated models using classification metrics.

Spam Email Detection | *Python, Scikit-learn, NLP, Streamlit* 2025

- Built an email spam classifier using CountVectorizer and Logistic Regression.
- Deployed the application using Streamlit for real-time spam prediction.

Technical Skills

Languages: Python, SQL, Java, C
ML / DL: Scikit-learn, TensorFlow, PyTorch, NLP, Feature Engineering, Statistics
Libraries: Pandas, NumPy, Data Analysis, SQL analytics
Frameworks & Tools: Streamlit, Django, Gradio, Git, GitHub, Jupyter, Google Colab, VS Code
Deployment: Hugging Face (models & Spaces)

Certifications

- **Advanced Certification in Artificial Intelligence** – Glowlogics Solutions (2026)
- **Artificial Intelligence Internship Certificate** – Glowlogics Solutions (2026)
